SPONSORSHIP INVITATION

Help MP SolarFlair Reach the Start Line

MP SolarFlair NPC is a Mpumalanga-based, not-for-profit organisation bringing together local businesses, engineers, students, volunteers and community members around an exciting goal: to design, build and race a solar-powered vehicle in the **2026 Sasol Solar Challenge**.

Competing under the broader **Team Mpumalanga** banner, MP SolarFlair has developed a locally built solar car and a community-driven programme that extends far beyond racing. The project provides a practical platform for **engineering, renewable energy, innovation, skills development and community involvement**, while inspiring young South Africans through science and technology.

About the Sasol Solar Challenge

The **Sasol Solar Challenge** is an international solar vehicle endurance event that brings together leading South African and international engineering teams to compete on public roads across South Africa. It showcases cutting-edge renewable energy, engineering and automotive technology and attracts significant public, social media and media exposure along its route.

We Need Your Support

With scrutineering for the 2026 Sasol Solar Challenge now only around **two weeks away**, we are working hard to close the final gaps in our budget and get **MP SolarFlair to the start line**.

A significant amount has already been achieved through the generosity of our sponsors, supporters and team members. However, we still have essential costs that need to be covered, including:

- Fuel and transport costs for our support convoy
- Team food and catering
- Event entry and participation costs
- Team clothing
- General logistics and operational expenses

At this stage, **financial sponsorship of any amount is one of the most valuable ways of helping us**. Contributions do not need to fund a specific item - every contribution helps close the remaining budget gap and gets MP SolarFlair one step closer to competing.

As a **registered not-for-profit company**, MP SolarFlair relies heavily on the support of businesses and individuals who share our enthusiasm for renewable energy, engineering, education and the development of local talent.

In return, we would be proud to recognise and promote the businesses and organisations that help make our participation possible through our **social media and team platforms, event presence and available sponsorship branding opportunities**.

We have attached our **MP SolarFlair information and sponsorship posters**, which provide more information about our team, our journey and the exposure available to organisations supporting us.

Help Us Get to the Start Line

Whether your business can contribute **R1,000, R5,000, R10,000 or more**, every contribution at this stage can make a real difference.

We would sincerely appreciate your support in helping **MP SolarFlair and our locally built solar car represent Mpumalanga** at the 2026 Sasol Solar Challenge.
